### AN INITIATIVE OF CDG FAMILIES IN COLLABORATION WITH CDG HEALTHCARE PROFESSIONALS.

Congenital Disorders of Glycosylation (CDG) are one of the fastest growing groups among the more than 8000 rare diseases currently known. CDG research poses unique challenges: small size populations, geographically dispersed patients, scattered medical and research professionals, lack of funding, few resources

and so forth. In an attempt to overcome all of these hurdles, a unique, patient-led, multi-stakeholder unrivalled infrastructure for investigation and treatment of Congenital Disorders of Glycosylation (CDG) has been created - CDG & Allies - Professionals and Patient Association International Network (**CDG & Allies-PPAIN**).

### PARTNERSHIP IS THE KEY:

"COMING TOGETHER IS A BEGINNING; KEEPING TOGETHER IS PROGRESS; WORKING TOGETHER IS SUCCESS." ... HENRY FORD

RESEARCH IS ORCHESTRATED TO FOSTER KNOWLEDGE THAT LEADS TO BETTER QUALITY OF LIFE.
