The EURORDIS Black Pearl Awards Ceremony takes place in February to mark the occasion of [Rare Disease Day](#).

The Black Pearl Awards recognise the major achievements and outstanding commitment of patient advocates, patient organisations, policy makers, scientists, companies and media who strive to make a difference for the rare disease community.

There were **hundreds of nominations from over 37 different countries** worldwide.

The EURORDIS Photo Award

The EURORDIS Photo Award is open to everyone around the world. It is an opportunity to visually express the reality of living with a rare disease, the joy and the challenges. After online submissions closed on 7 January, world-renowned National Geographic photojournalist Marcus Bleasdale shortlisted five photos for the [public vote](#).

The winner will be announced live (watch online via blackpearl.eurordis.org/live) at the EURORDIS Black Pearl Awards this evening. The three finalists with the most votes will each receive a prize.

EURORDIS-Rare Diseases Europe

EURORDIS-Rare Diseases Europe is a unique, non-profit alliance of over 800 rare disease patient organisations from more than 70 countries that work together to improve the lives of the 30 million people living with a rare disease in Europe.

By connecting patients, families and patient groups, as well as by bringing together all stakeholders and mobilising the rare disease community, EURORDIS strengthens the patient voice and shapes research, policies and patient services. Follow [@eurordis](#) or see the [EURORDIS Facebook page](#). For more information, visit [eurordis.org](#).

Rare diseases

The European Union considers a disease as rare when it affects less than 1 in 2,000 citizens. Over 6,000 different rare diseases have been identified to date, affecting an estimated 30 million people in Europe and 300 million worldwide. Due to the low prevalence of each disease, medical expertise is rare, knowledge is scarce, care offering inadequate and research limited. Despite their great overall number, rare disease patients are the orphans of health systems, often denied diagnosis, treatment and the benefits of research.
